Summary

Full Stack Developer with 3+ years of experience designing and developing enterprise web applications using React.js, TypeScript, Node.js, Express.js, and PostgreSQL. Experienced in building scalable RESTful APIs, implementing JWT authentication, RBAC, and multi-level approval workflows. Skilled in SAP integrations, database optimization, and developing responsive, high-performance frontend applications. Proficient in delivering end-to-end features across multi-tenant SaaS platforms and enterprise workflow management systems.

Work Experience

BPAAS Solutions Jan 2025 - Oct 2026
Software Developer *Gurugram, Haryana*

- Developed and maintained **three enterprise applications** – Travel Expense & Reimbursement Management, Electronic Gate Pass (EGP/IGP), and Vendor Onboarding – using **React.js, TypeScript, JavaScript, Node.js, Express.js, and PostgreSQL**, reducing manual effort and processing time by **30 - 40%** through workflow automation.
- Designed and developed **RESTful APIs** for travel claims, reimbursement processing, employee data management, and multi-level approval workflows, implementing business validations to improve process efficiency and reduce manual intervention.
- Implemented **JWT authentication, role-based access control (RBAC), Okta SSO, OTP verification, and password reset functionality**, strengthening application security and simplifying user access management across enterprise applications.
- Designed and optimized **PostgreSQL schemas, queries, and indexes** and built role-specific dashboards using **React.js, Redux, and Material UI**, improving data accessibility, expense tracking, and approval visibility for business stakeholders.
- Improved application performance and maintainability through **lazy loading, reusable React components, code optimization, and Core Web Vitals improvements**, delivering responsive and scalable user interfaces.
- Integrated **SAP, HRMS, and third-party travel APIs (MakeMyTrip)** to synchronize employee and vendor data, retrieve purchase orders, and streamline travel booking and goods movement processes; developed responsive interfaces using **Tailwind CSS and Material UI** and improved performance through lazy loading, reusable components, code optimization, and Core Web Vitals improvements.

AlphaXloop Jul 2023 - Dec 2024
Associate Software Engineer *Remote*

Multi-Tenant SaaS Workflow Management Platform | *React.js, TypeScript, Node.js, Express.js, PostgreSQL, Redis*

- Developed a **multi-tenant SaaS platform** enabling multiple organizations to operate on a **single codebase**, reducing maintenance overhead by **40%** and simplifying customer onboarding and business scaling.
- Designed **RESTful APIs** for workflow execution, task assignment, and approval management, implementing **JWT authentication, granular RBAC, and tenant-level data isolation** to enforce secure access across organizations.
- Optimized **PostgreSQL queries** using **composite indexes, execution plan analysis, and server-side pagination** to improve response times for workflow and reporting endpoints.
- Implemented **asynchronous background processing using Redis-backed job queues** for email notifications, scheduled tasks, and workflow status updates, reducing blocking operations in API request handling.
- Developed **reusable React components with Redux Toolkit** for centralized state management, applying **lazy loading, memoization, and API request optimization** to improve dashboard responsiveness.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, SQL, Java
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS
Backend: Node.js, Express.js, RESTful APIs, Microservices, Middleware Design, JWT Authentication, OAuth 2.0, RBAC
Databases: PostgreSQL, MongoDB, Prisma, Sequelize, Mongoose, SQL Query Optimization, Database Indexing
Integrations & Tools: SAP(OData, RFC), AWS, Kafka, Okta SSO, Git, GitHub, GitHub Actions, Docker, Postman, Redis
Core Concepts: Data Structures and Algorithms (DSA), DBMS, Operating Systems, Object-Oriented Programming (OOP), Computer Networks, API Design, Authentication and Authorization, Performance Optimization

Education

ABES Engineering College Jul 2019 - Jul 2023
Bachelor of Technology in Information Technology – CGPA: 7.15/10 *Ghaziabad, Uttar Pradesh*

Achievements and Certifications

- **Solved 200+ coding problems** across LeetCode, CodeChef, and HackerRank.
- **Full Stack Web Development** – Masai School (React.js, Node.js, Express.js, MongoDB).
- **Introduction to Networks** – Cisco Networking Academy (TCP/IP, Networking Fundamentals, Protocols).
